

Established since 1999, AmpleSys Technologies has designed & developed number of customized business softwares. Streaming down business activities in a proper system to manage purchases, sales, inventory, report generation, staff, users and other useful benefits is the crunch of any software. Right from taking down brief from client till installation testing all are carried under one roof. Throughout these years, we have gained vast knowledge in the field of software development ranging from retail business to traders, to distributors & manufacturers.

From 1999, we have been developing customized software for various industries e.g.

- ▶ Gear Coupling Manufacturing
- ▶ Gauges & Tools Mfr.
- ▶ Steel Shelving, Racking & Cupboards Manufacturing
- ▶ Powder Coating Industry Manufacturing

What is ABS Software?

ABS Software is a complete Business Analysis Software. Analysis is to show / compare the smallest information of the level of business. It enhances the flow of business and shows the way of increasing productivity. **How** is the item flow? **Which** items are running on a regular basis? **Which** items are giving more Profits? **How** is the product rates comparison? **Which** party has purchased materials? **When** and at **What** rate? **What** is the landing cost? **How** much is the Dead Stock? These and many such questions arise while operating a business. **ABS** gives you flexibility in managing the software. **ABS** increases Accuracy & Speed in your Decision Making by saving your time spent in acquiring the information from your accountant, sales, purchase & stores etc. **ABS** reduces your time spent on paper & manual work and helps you to concentrate more on Business IDEAS.
