

Glu-Man

Hanfas[®]
Engineered to Simplicity

The 'Glu-Man' glue spreader from "Hanfas" is a manual hand-held glue applicator with two rollers. It is available with micro adjustment for variable flow of glue application. It facilitates easy and even spread of glue over large panels as well as curved surfaces. Besides being user friendly, it also enhances the operator efficiency.

It is best suited for glues having short setting time properties, enabling optimum utilization of large panels in less time. Any make or brand of glue having suitable solvent as cleaner can be spread with this amazing 'Glu-Man'. A spread of approx. 600gms of PVA glue, and approx. 900gms of PU + hardner based glue for 8' X 4' panel can be achieved.

Either ways 30% glue savings is gained against spreading with brush, spatulas or rollers.

No stress no mess.

Work can be completed in half the time, thus making it possible to complete large volumes of pasting in short target time. Project schedules can now be defined.

Available in stainless steel material of construction to suit a wide range of adhesives and in different sizes.

Experience the professional wood culture of rapid glue spreading with HUGE savings in glue consumption by adopting the Glu-Man from "Hanfas"

Glu-Man

Snap fit lid to avoid dust and other particles from entering the pot and assures smooth application

Provisions for adding a top roller for small width pasting jobs.

Stainless steel tank with large capacity

Micro - Adjustable to a wide range of adhesives

Stainless steel tank built to last for long industrial use - Totally Rust Proof

Brass knobs

Sparrow lever for dry rolling to even out the application

Metal stand

200mm roller size allows a larger coverage in short time.

Anilox textured PU roller for superior finish.
